

Another feature of our copiers is the ability to scan a document directly to your email. When you get back to your computer, your scanned document will be waiting for you in your email account and you can then save it on your computer, flash drive, "H" drive, or send it on to others! I suggest you email to yourself from the copier and then forward on to others from your computer.

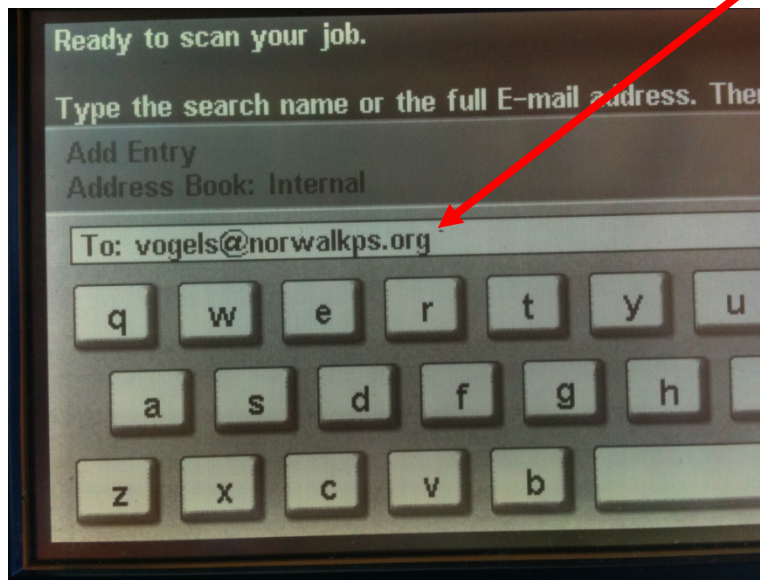

Press on "E-mail" on the copier menu.

Press "To" in the menu.

Using the keypad, type in your complete email address into the "To:" field. Then click on Enter

Put your document into the feeder on the copy machine and press "Start". Your document will be scanned and sent to your email address!
