Re: Asbestos and PCB Removal – Front School Window/Window Walls
West Rocks Middle School
Norwalk, Connecticut

This is to inform you that starting on Friday, June 16th, we will be constructing abatement critical barriers, disturbing and removing asbestos and PCB containing materials from the front windows/window walls and door systems at West Rocks Middle School. The work is scheduled to be completed by July 28th, prior to school starting on August 30th. Per our notification to the State of Connecticut Department of Public Health, no children are allowed within the building during the dates of work. This includes children using the adjacent athletic fields as well.

Please be advised that all work will be conducted within the Federal and State regulations. During this project the contractor will be periodically monitored by Langan Engineering and Environmental, Inc. (Langan), a licensed industrial hygienist. Work areas will have air sampling performed periodically during abatement to insure the air quality is acceptable prior to normal building occupancy.

Please post this notice on the schools entrance doors, Teachers' Room and distribute to all staff, parents and additionally, programs using the fields.

If you have further questions, please contact me at (203) 239-1683. Thank you for your cooperation.
